4 Foot Fluorescent Lamps	2,221	2/12/2010
2 Foot Fluorescent Lamps	71	2/12/2010

This Certificate of Recycle certifies that the mercury-containing lamps received from have been properly shipped to a facility in which they have undergone mechanical processing to separate lamp components into three primary material groups: (1) glass (2)metal (3) mercury-containing phosphor powder. Also that the reclaimed metals and crushed glass have been prepared to meet specifications of commercial and industrial products. And finally, that the mercury-containing phosphor powder will be retorted, utilizing a Retort-In-Place System that recovers mercury as a product that will be sold back into commerce. No Mercury contaminated waste is generated from the facility.

Lights Out Disposal Company, certifies that the information contained in or accompanying this document is true, accurate and complete or the best of its knowledge.
